
Horizons comparison · 3 seeds · mean and min–max range
250 ticks; 40 arrivals/tick; 10×10 neighborhoods, k=8; employer on; hop cost 1.01
Q1 lowest / Q5 highest baseline budgets · unmatched arrivals · shared baseline reused
Housing exclusion · Q1 & Q5
Displacement off
Unhoused share
Zoning on, H=5, roads off · Q1
Zoning on, H=5, roads off · Q5
H=20 · Q1
H=20 · Q5
Simulation tick
Residential sorting · housed
Population-weighted Gini
Zoning on, H=5, roads off
H=20
Simulation tick
Job access · Q1 & Q5 housed
Mean effective distance
